

Stellar Kids Dentistry Saves **\$3,600** Per Month with Zuub

CHALLENGES

- Lengthy insurance verification process
- High costs associated with verifying insurance

RESULTS

\$3,600 Saved
per month

15 Hours Saved
per week

Medicaid Verified
automatically

Improved
patient experience

OBJECTIVES

With over 225 patients per day across 3 offices, Stellar Kids Dentistry needed to find a dental insurance verification service that could accurately and affordably verify Medicaid insurance. Their goal was to streamline insurance verification processes, allowing their team to uphold a high standard of patient care without compromising efficiency.

SOLUTIONS

Zuub's Automated Insurance Verification feature streamlined Stellar Kids Dentistry's insurance verification processes by drastically reducing the amount of time the front office staff had to spend verifying insurance. The time and cost savings Zuub provided across all three office locations not only paid for Zuub but put money back into the practices.

BENEFITS

Massive Cost Savings - \$1,200 per month, per office

"Saves 3 hours a day verifying Medicaid and most of our staff is at least \$20 an hour, so \$60 bucks a day were saved in one office. And then to be able to use the other insurances is even more beneficial because it's all in one place."

Best Medicaid Insurance Verification Software

"We honestly picked up Zuub just for Medicaid because it's that much of a time saver. State Medicaid is so time-consuming and Zuub was one of the few that would even touch it. It's hard because State Medicaid doesn't allow a lot of third party access and are very selective in what services they allow."

Huge Time Saver

"It's been a time saver. It's Huge! The cost it takes to just check Medicaid insurance vs. the cost for Zuub, Zuub was way less money without even touching private insurances, just with only verifying state Medicaid."

Enhanced Patient Satisfaction

"We're able to have verifications done quicker and we can interact with the parents and children more and have a stronger presence for the patients and not just sitting with our heads down trying to verify insurance."

ANDI M
Office Manager

“Before Zuub each person probably spent 75% of their day checking insurance.”
